

SEAT CUSHIONS & PILLOWS

Foam Blend Down | This cushion is comprised of a combination of two foams in the core. The inner core is high-density foam to insure support and a layer of soft plush foam is added to give an initial soft comfort sit. This combination foam core is then enclosed in a 80%-20% blend of fibers and feather/down. This poly/feather/down mixture is encased in down-proof ticking, which is channeled to keep fibers smooth and separated. Foam Blend Down seats have a casual, relaxed look. **Some packing of the fiber should be expected and not considered a defect. Approximately 10% of packing is expected. Occasional fluffing should be expected.** Please refer to the limited warranty page for more information on the warranty for cushions. | page 142

Lounge Spring Down | This cushion is a Marshall spring core unit wrapped in polyurethane foam. This core is then enclosed in a 50/50 blend of polyester fibers and fiber/down. This fiber/down mixture is encased in a down-proof ticking, which is channeled to keep fibers smooth and separated. Lounge Spring Down seats have a casual, relaxed look. **Some packing of the fiber should be expected and not considered a defect. Occasional fluffing should be expected.** This is a one-sided, non-flippable cushion that is offered on select styles only.

Spring Blend Down | This cushion has a Marshall spring core unit wrapped in polyurethane foam. This core is then enclosed in a 80%-20% blend of polyester fibers and fiber/down. This poly/feather/down mixture is encased in down-proof ticking, which is channeled to keep fibers smooth and separated. Spring Blend Down seats have a casual, relaxed look. **Some packing of the fiber should be expected and not considered a defect. Occasional fluffing should be expected.** Please refer to the limited warranty page for more information on the warranty for cushions. | page 142

Classic Comfort | This cushion is a high-density foam core wrapped in Dacron fiber on top, bottom, and sides. This core is then encased in a non-woven cover filled with polyester blend down fiber. This cushion is allergy friendly for those who are allergic to feather/down cushions.

Blend Down Back Pillow | The ultimate fill for back cushions or throw pillows. These backs are filled with a combination polyester fibers and grey duck down/feathers enclosed in a down-proof ticking. **Some packing of the fiber should be expected and not considered a defect. Occasional fluffing should be expected.**

Classic Comfort Back Pillow | The fiber in our backs is conjugated polyester. This fiber is naturally non-absorbent and resists matting, clumping, and mildew. It is odorless, lint free and non-allergenic. All fibers are blown into channel-sewn back ticking. These channels help maintain the proper proportions of back filling. **Some packing of the fiber should be expected and not considered a defect. Occasional fluffing should be expected.**

Our cushions and back pillows are proudly crafted in America. We recognize that every frame has its own ergonomics. To achieve ultimate comfort, we offer only the most premium foams, fibers, and feathers.
